

Elevate your coffee drinking experience.

The better you understand what happens behind and inside your morning cup, the more your appreciation for it will grow. Together with that also comes the chance to develop a better coffee palate. Savour all the unique aromas and flavours. Experiment with milk froths and beverage types. And, in the process, make it part of a healthy diet when taken in moderation.

One drink, many benefits.

Coffee can be part of a healthy diet. In blood pressure and dehydration. But today, we know this isn't true.

Drinking two to three cups of coffee a day, which contains over 1,000 active ingredients, reduces your risk of heart

disease, type 2 diabetes, and colon cancer. So, make sure you get all the nutrients and flavours from your cup.

What's in your coffee?

A cup of coffee usually has between 40 and 120 milligrams of caffeine. And the amount of water used in brewing process also affects this amount.

Your cup also has minerals like iron and magnesium; essential vitamins your cup also has minerals like iron and magnesium; essential vitamins like B2, B6, and niacin. Coffee is also rich in antioxidants like flavonoids and resveratrol. Prepared well, you can get all these benefits from your morning cup.

Coffee the healthy way.

Coffee is still a stimulant. How it's prepared determines whether or not you get all its benefits. The right water pressure extracts its aromas, and also reduces the acidity. The water temperature and the speed at which it runs through also plays a role.

Let your fully automatic coffee machine do the work for you. Note that the features of your appliance depend on the model. And you can find the individual programs, features and functions of your appliance in your personal [My Siemens](#) account.

Better with milk foam.

The quality of the foam can vary depending on the type of milk or vegetable beverage used or even the respective brand, ingredients and nutritional values. In addition, there may be quality deviations within the different product batches.

Milk substitutes? Try almond, oat, or soy milk. Avoid rice milk or coconut

milk because their low protein content isn't ideal for frothing.

Fresh pastry made at home.

No need to get out of the house for fresh pastry and bread. Your oven is all you need to enjoy warm buns, bread, croissants or some pain au chocolate. Here's how to enjoy the ease.
