Planning the perfect party.

A few close friends, great food, and your Siemens Home Appliances — everything you need to host a memorable dinner party at home.

Helpful advice for hosting.

Sharing a meal is always a special occasion. But while the idea of clinking glasses and laughing late into the night is appealing, the planning and preparation part can be stressful. To help you pull off a fun-filled feast flawlessly, we'll explore some of the innovative functions and smart technology that your Siemens Home appliances have to offer.

And to know more about the individual programs and functions of your hob or oven, you can find them in your personal [My Siemens](#) account. It has all your appliance info in one place.

[COMMON.SEE_MORE]

Start preparation the day before.

Avoid the stress by planning your menu and shopping in advance. Prepare one or more dishes the day before such as dips, cold desserts and certain types of salad.

When planning your menu, remember that cooking in the oven requires less attention than using the hob. Try baked casseroles or oven-roasted meats and vegetables. To make sure the tableware you want to use are pristine, do a quick eco-wash the night before.

Encourage participation.

A great way to make your guests feel special (and lighten your load) is to assign duties for the night. These can include welcoming other guests, controlling the music, pouring drinks, assisting you in the kitchen, taking photos or bringing their favourite game along.

Get the most out of your home appliances.

The greatest challenge for every chef is finding the optimal cooking temperature for each dish. If you have a bluetooth enabled Siemens hob, you might want to consider getting a cookingSensor Plus device. This smart heat sensor attaches to your cookware and communicates with your hob, adjusting the setting to regulate the cooking temperature and prevent overboiling. And to help you get the right sizzle on your sauté, we integrated the fryingSensor Plus into our latest range of Siemens induction hobs to prevent your pans from getting scorched.

Helpful hacks for last-minute hosting.

- Use the Home Connect app to check the integrated in-fridge cameras to see what ingredients you have, wherever you are.
- Keep it simple. Choose a dish with a few ingredients, that can easily be done, like a roast or stir-fry.
- Whatever you opt for, it's always a good idea to keep emergency ingredients that have a long shelf life.

A quick and healthy three-course meal to impress your guests.

For a starter, try a mixed veggie platter with hummus. Just blend chickpeas, sesame oil, lemon, cumin, and garlic. For a quick main course, go for pasta with seafood. Cook your seafood with the pre-set fish program while you boil your pasta to al dente. For dessert, try a fresh fruit platter.

Shop with purpose.

Becoming a skilled home cook is more than just about understanding the basics of cooking. It also means becoming a more conscious consumer. Examine your regular grocery shopping habits. Determine how you can buy and consume more sustainably.

Gourmet made easy.

There's more to your Siemens oven than just baked goods or roasted vegetables. Discover how to make the most of all its innovative features. Expand your kitchen repertoire, learn new techniques, and elevate your cooking from simple to gourmet with ease.

Taste precision cooking.

Preparing a meal is more than just about ingredients or recipes. It's also about controlling heat, maintaining precise temperatures, and cooking with confidence. Leave your apprehensions behind. Start cooking like a professional at home.
